

8 DriTac Adhesive Group has added Easy Spread DriTac 7400 Moisture Cure Urethane to its line of wood flooring adhesives. Designed for installing exotic woods, multi-ply engineered plank, acrylic impregnated wood, parquet, plywood and solid plank flat-milled flooring up to ½ inch thick, Easy Spread DriTac 7400 is easy to spread and cleans up when wet, resulting in better productivity for contractors, the company says. DriTac 4700 contains no water, is low-odor, non-slumping, freeze-thaw stable, has high initial tack and forms a permanent bond. Available in 2- and 4-gallon containers, Easy Spread incorporates the strength of a moisture-cure urethane adhesive with easy spreadability and user-friendliness, the company adds.
