Ceno Group

Ceno Group's Scraper +Plus removes paint, adhesives, epoxy, thinset and more from a concrete subfloor, the company says. It is environmentally safe, fits any floor machine and is ideal for uneven concrete, the company adds.

dB Sound Control Solutions

The dB-4Pro is a mass-loaded, limp-vinyl sound-damping material that has been engineered to reduce sound transmission. It is used underneath hard flooring surfaces to reduce both impact and airborne noises and delivers an impact insulation class (IIC) as high as 70 on concrete slabs.

Electro Plastics Inc./STEP Warmfloor

STEP Warmfloor is a low-voltage, self-regulating, PTC Nano-polymer heating system. Its self-regulating properties mean the elements act as a floor sensor over the whole surface—they cannot overheat and can go under all floors, including wood. The system can run on AC/DC and is extremely energy efficient, the company says.

Fidbox LLC

The HMbox monitors the job site and substrate pre-installation, and the Fidbox (embedded into the floor) monitors the product, substrate and job site post-installation. These pre- and post-installation tech tools save the contractor time, money, aggravation and possible litigation, the company says. The devices create reports that can be printed or emailed to the flooring manufacturer, builder, homeowner or whomever has interest in the data they collect.

Delmhorst Instrument Co.

ProScan is Delmhorst's pinless moisture meter for flooring installers and inspectors to determine if wood is at equilibrium with its environment. ProScan has built-in species correction capability through specific gravity adjustment to measure a wide range of wood types, making it ideal for wood flooring, the company says.

DriTac Flooring Products

DriTac's new and improved MCS 7000 is a "green" two-part epoxy, concrete moisture control system that mitigates vapor emissions up to 100 percent relative humidity and 25 pounds. Offering a low perm rating, enhanced warranty and six-hour cure time, it is designed to be a first line of defense against subfloor moisture damage in wood and resilient flooring installations, the company says.

Fortifiber Building Systems Group

Accord sound-rated flooring pad maintains comfort underfoot, providing an acoustic barrier along with dependable moisture vapor protection with no detectable VOCs, Fortifiber Building Systems Group says. Its integrated seam seal tape makes it easy to install, the company adds. It is also a Class I moisture vapor barrier over concrete.
