► ROYOMARTIN

RoyOMartin's Eclipse™ Reflective Housewrap saves builders both time and money. As the only product of its kind approved to replace traditional house wrap, this OSB panel with pre-applied radiant barrier foil serves as a superior thermo/vapor sidewall system when used with approved reflective tape. Eclipse™ Reflective Housewrap is offered in 8-foot and extended lengths and has a Class "B" fire rating, further enhancing its performance capabilities.

▲ DRITAC'S NEW & IMPROVED MCS 7000 CONCRETE MOISTURE CONTROL SYSTEM

DriTac's New and Improved MCS 7000 is a premium "green" two-part epoxy, concrete moisture control system that mitigates vapor emissions up to 100% relative humidity, prior to the installation of wood, resilient, carpet tile and all floating floors. Manufactured in the USA, this easy-to-mix and apply formula allows for same-day installations with a 6-hour cure time and eliminates the need to shot blast."
