Delmhorst Instrument Co.

ProScan is Delmhorst's pinless moisture meter for flooring installers and inspectors to determine if wood is at equilibrium with its environment. ProScan has built-in species correction capability through specific gravity adjustment to measure a wide range of wood types, making it ideal for wood flooring, the company says.

DriTac Flooring Products LLC

Primer 3000 is a concentrated, solvent-free acrylic primer for use on concrete, wood and lightweight underlayment. Self-leveling underlayment and floor patches can also be installed over Primer 3000 for wood, resilient and carpet tile flooring installations. The single-component, quick-drying primer offers easy application by broom, sprayer or nap roller, the company says.

Electro Plastics Inc./Step Warmfloor

Step Warmfloor is a low-voltage, self-regulating, PTC Nano-polymer heating system. Its self-regulating properties mean the elements act as a floor sensor over the whole surface—they cannot overheat and can go under all floors, including wood. The system can run on AC/DC and is extremely energy efficient, the company says.

Fidbox LLC

The HMbox monitors the job site and substrate pre-installation, and the Fidbox (embedded into the floor) monitors the product, substrate and job site post-installation. These pre- and post-installation tech tools save the contractor time, money, aggravation and possible litigation, the company says. The devices create reports that can be printed or emailed to the flooring manufacturer, builder, homeowner or whoever has interest in the data they collect.

Fortifiber Building Systems Group

The Accord sound-rated flooring pad maintains comfort underfoot, providing an acoustic barrier along with dependable moisture vapor protection with no detectable VOCs, the company says. Its integrated seam seal tape makes it easy to install, the company adds. It is also a Class I moisture vapor barrier over concrete.
