**SPECIFICATIONS AND GENERAL PROPERTIES**
MATERIALS:
Contains 96% pre-consumer rubber being recycled to protect the environment, minimize landfills while making LEED contribution. Colors will vary. Other thicknesses available.

SOUND:
EnviroTread rubber underlayment has been professionally tested using the American Society for Testing and Material Protocol ASTM E492-04 and classified in accordance with STM E989-89 earning a classification of 60 IIC, 54 STC. When compared to equal thicknesses and test methods of other underlays, EnviroTread rubber underlayment will provide superior results of sound attenuation and support.

MOISTURE:
Under Wood Flooring: Concrete slab moisture must not exceed 5 lbs. on Calcium Chloride Testing or 85% RH. Under Carpet and Carpet Tile, Ceramic Tile and Stone, and Laminate Flooring: Concrete slab moisture must not exceed 8 lbs. on Calcium Chloride Testing or 90% RH.

If concrete moisture exceeds these limits, DriTac MCS 7000 must be applied to the slab, prior to the installation of EnviroTread underlayments.

FUNGUS/MILDEW:
EnviroTread rubber underlayment is non-absorbent so will not support mold and mildew. No harsh chemical treatments are necessary.
